

Adobe Acrobat PDF Template Instructions

Please consult your equipment user's manual for instructions on how to run specialty paper, and equipment limitations.

Templates provided by Blanks/USA are intended to assist with proper document layout, format and setup when setting up artwork to print on Blanks/USA die cut products.

Adobe Acrobat templates are available as a .pdf file and are not a fillable form type template. The pdf template can be used with programs such as Adobe Illustrator, InDesign, and QuarkXpress. These templates can be placed on documents similar to images. These are designed to preview the product and dimensions

Safe Print Area
The area marked by the green line is called the safe print area. Please remember to keep all important information within this area.

Die Lines
The areas marked by a black or gray line are the die lines. We suggest aligning art and type at least 1/4" away from perforations and die cuts. Many copiers and laser printers don't pull paper completely straight.
